We Do: Medical (Neuro-Cardio-Autoimmune), Informatics (knowledge, not merely "data"), Intelligence (analytics, predictives), AIoMT ("AI of Medical Things"), Population Health Equity (public health equality) and more.

We are all of these, integrated, beautifully, powerfully, in ways that intelligent executives at companies like those listed below will definitely recognize that They need Us to Compete and Survive.

We are looking for someone with business, finance, and capital (funds development) capabilities for this medical - healthcare - wellness business. It is not a clinic or private practice nor a hospital, but it is run by a team of MD, DO, RN and PhD specialists in certain neurological and cardiovascular areas. We address Solutions pertaining to (among others): dysautonomia, arrhythmia, AFIB, IBS, POTS, MALS, and aspects of certain autoimmune and inflammatory conditions including "Long COVID".

A major part of the business involves (a) acquisition and management of population health data, through social media including our own suite (but also

others), and (b) making forecasts, projections, trends, predictions, pertinent to the people and to the markets. This Intelligence Information gets provided (sold) to corporate and other clients. Also there are other revenue streams. There is also a suite of new medical diagnostics and therapeutics for use by clinicians within the entire medical field.

Persons may be working or engaged remotely. Travel is only when it is essential and important. We take great care to ensure that Our People Enjoy their Work and that no energies are wasted.

Our revenues come primarily from major corporations like those listed below.

Our product is used by healthcare providers (all types) and patients-people-everyone. Our Intelligence Information is also used by corporations such as "Big Pharma" and "Big Media, Internet, Communications".

Yes, there is a major internet and social-networking component; that is only Part of the picture - but it is a Big Part, including for revenue streams.

What we produce in the information and intelligence domains, we give to our revenue-generating corporate and institutional clients, customers, partner-sponsors, and WE also use it ourselves in refining new and improved diagnostics and therapeutics pertaining to neurological, cardiovascular, gastrointestinal, autoimmune, and inflammatory disorders and diseases. Quite a large set of medical problems, with certain common and fundamental causes, links, dependencies, - and ways to detect and diagnose earlier and give easier non-invasive treatments faster.

Your role is to Make Connections with Key Persons in such companies and institutions as these listed here, because each of them, in their categories, knows that (1) Without certain major new change, they will fail and lose out to their competitor, and (2) With what We alone have and offer, they can attain dominance over their competition. EXAMPLES:

- Epic, NextGen, Allscript, Cerner, McKesson, Meditech
- WebMD, Mayo, HealthLine, HealthTap
- Twitter, LinkedIn, Roblox, Google
- Telegram, Viber, Signal
- Tencent, Alibaba, TikTok, Huawei
- Verizon, ATT, T-Mobile, Sprint
- Walmart, Rite-Aid, CVS, Walgreen
- certain large consumer chains including in the food and restaurant business

You can visit [www.neuroplex-c.tdyn.org](http://www.neuroplex-c.tdyn.org) (medical STEM) and [www.intelrenaissance.com](http://www.intelrenaissance.com) (parent company and partner), but the Important information comes only after speaking and proceeding to the next levels.
