

This is some of what I and some previous and recent companies (including IRI), and TETRAD Institute, have done to serve People, with humanitarian, social, cultural, legal, and other projects and activities. Much (most) of this has been performed “*pro bono*” - voluntary, unpaid, and free - because I believe that science, technology, and my own intelligence and the gifts which I have received in my life, should be used with love and charity for the betterment of people’s lives and for their safety, security, health, and happiness.

I chose the path of Doing, not just talking, writing, and making noise in the media and internet.

Now I and a few other persons need involvement, engagement and assistance from others to be able to be Effective in the work of Today and ahead of us (all of us who care about Society and Life). You can help – the first step is thinking about what you can do that aids us All.

*Note: All of this was not-for-profit, not thinking about greed and how to grab money out of it, and often totally voluntary and with significant capital contributions by myself (plus the time and energy).*

~~~~~

§ World’s First true telemedicine network (CommonHealthNet and IMedNet), serving doctors and nurses with full-service text, voice, video for critical-needs information exchange in former Soviet Union (RU, UA, KZ) and Central Asia including post-Chernobyl children and other victims in Ukraine – early 1990s (USA and international)

§ First known internet project for poor, urban, and mostly black Teen-agers and Single Pregnant Women and women with infants, providing basic personal/medical information resources and guides – mid 1990s (USA)

§ *Futures Gateway* – STEM education and team-building project, children ages 10-18, working as teams on cooperative and collaborative projects about how the future would be in different STEM and social aspects - international in over 12 countries including USA, UK, EU, Russia, Israel, Jordan, Iraq , and targeting youth in zones of conflict and war - early 2000s

§ Personal onsite hands-on volunteer work with public emergencies and disasters such as after earthquakes, floods, hurricanes, lost and missing children in wilderness areas – USA (Maryland, Virginia, Michigan), Costa Rica, Philippines, India, Ukraine, Russia - over many years from 1970’s onward

§ Radiological testing and other medical assistance, and design of recovery pathways for family, social and economic life, including smart, safe agriculture in radiation-afflicted zones – Ukraine (post-Chernobyl events, 1990s) and Japan (Fukushima, 2011-2012)

§ Construction of mobile Pods for emergency relief in Philippines after major typhoon Haiyan, for use in residence and medical care and education – 2013

§ Design and preparation of a mobile Pod-based hospital and clinic system for use in Baghdad and Mosul, Iraq – 2013-2014 (disrupted by ISIS takeover of the region)

§ STEM advisor for ShaktiWarriors education program for mostly poor, immigrant and indigent children, ages 6 – 12, in American public schools within several cities – [www.shaktiwarriors.com](http://www.shaktiwarriors.com) – 2013-2017

§ Mirnova Project(s) which have been all focused upon STEM education for youth and young adults, particularly with robotics and UAV drones. International, with results produced by teams of interns and apprentices. One outcome was an award-winning robotic irrigation and fertilizer/pesticide control unit for farms of any size. Visit [www.mirnova.tdyn.org](http://www.mirnova.tdyn.org) – 2016-present

§ Librarium Program and Project, also with youth and immigrant participation, and focused very much on “SOUL” – Survival and Sustainability of **O**rganized **H**uman **L**ife. Visit [www.librarium.tdyn.org](http://www.librarium.tdyn.org) – 2017-present

§ Personal volunteer pro-bono legal assistance, as an expert witness on different cases, for people who needed legal help but had no money nor any hope – 1990s-present

§ Personal volunteer work giving COVID tests, vaccinations and public information and other volunteer work with Salvation Army and different organizations – 2020-2022

§ Personal care-giver assistance to individuals and families with Multiple Sclerosis, Alzheimer’s, Parkinson’s, POTS and several other chronic diseases – over many years and especially 2014-present

This is why there is a TETRAD Institute and the way that it is.

This is why there is an IRI (Intelligence Renaissance Industries) and the way that it is.

This is why there is an OASIS and why I am so dedicated to a Smart and Healthy Life and everything in it.

This is why there is a program called New Horizons: Beyond 2020 Vision with its diverse components like ASTRIC, Tethys, and so much focused upon community, collaboration, and the working-spirit of “coadunatio”

This is why I am not sitting in a oversized gaudy mansion in Silicon Valley or Seattle, or relaxing and having a selfish hedonistic life on a superyacht.

This is why I am alive, working now every day, and wanting to Get Good Things Done for People.

I and the people with me are not greedy. The time is now for assistance and cooperation to make use of what we have, do and will do more.
