

Sients and Debora

Synthetic Intelligent Entities (Agents) and Debora, a Sient

[being revised and reviewed – patience please]

Key points:

von Neumann machines – self-programming

Genetic model – based upon eukaryotic biology – nucleic acids and proteins

MIMD, CSP, CDP, Lambda calculus and occam calculus

Sients are not simple bots or agents. They possess self-awareness in a manner unique to their nature and function

Debora is the first true sient.

Coming soon...
